EXPERIENCE

Aether

May 2026 - Present

- Technical AI safety researcher.
- Currently working on sandbagging in LLMs.

MATS + MATS extension (Redwood Research stream)

Jan 2025 - Mar 2026

- Building realistic model organisms of reward hacking.
- Agentic reinforcement learning on frontier LLMs at scale.

ERA Fellowship

affiliated with Cambridge University, Jul - Aug 2024

- Empirical study of deceptive and scheming tendencies in frontier LLMs.

SatisfIA

Feb - Jun 2024

- Full-time technical AI safety internship.
- Practical and theoretical aspects of aspiration learning in deep reinforcement learning settings and known world model planning settings.

Realizability Interpretation of the Countable Axiom Of Choice

Jun - Jul 2023

- Theoretical computer science research internship.
- Formalization in Coq.

PUBLICATIONS

Towards Safe Multilingual Frontier AI arXiv GitHub

- Study of the refusal rates of different models in the 24 official EU languages.
- My contribution was writing the code.

Recontextualization Mitigates Specification Gaming without Modifying the Specification arXiv

- My contribution was running some additional RL experiments.

AWARDS

Silver and Bronze International Mathematical Olympiad (IMO) Medals

- Also participated in other international math olympiads (RMM, JBMO, MYMC).
- Participated in national computer science competition (Prologin).

EDUCATION

École Normale Supérieure Paris

2022 - 2024

- Bachelor's in Computer Science
- Bachelor's in Mathematics

Lycée Louis-le-Grand

2021 - 2022

- Undergraduate Mathematics & Computer Science & Physics
- (Classe Préparatoire MP2I)

TRAINING

ARENA Bootcamp

Sep 2024

- One month long hands on empirical AI safety bootcamp.
- Interpretability, evals, reinforcement learning.
- PyTorch, TransformerLens, LLM APIs, Inspect AI.

ML4Good Camp by EffiSciences

Oct 2022

- One week long hands on technical AI safety bootcamp.
- PyTorch, LLMs, mechanistic interpretability, conceptual AI safety.

Xena Project Undergraduate Workshop

Imperial College London, Sep 2022

- One week long hands on Lean theorem prover workshop.
- My team worked on the Shannon-Lovász capacity theorem.

TEACHING

Olympiad math classes at Animath and Lyon Discrete Math Club.

Assistance with AGI Safety Fundamentals at École Normale Supérieure Paris
